Introduction

AAKP is committed to increasing awareness on issues important to patients and making the patient and caregiver community aware of research opportunities that they may qualify for, such as market research and clinical trials. AAKP utilizes its various communication platforms to customize educational awareness campaigns and clinical trial awareness campaigns to target specific audiences to maximize reach, exposure, and recruitment efforts.

For more information on these opportunities, questions, or to partner with AAKP on a customized campaign, please contact Jennifer Rate at jrate@aakp.org or (813) 400-2394.

Example 2

AAKP is raising awareness of a clinical trial currently enrolling! Are you a non-diabetic chronic kidney disease patient? Click here to learn more about this trial & take a short online screener to see if you qualify: <https://bit.ly/FIND-CKD>

Pre-screener: <https://bit.ly/FINDCKDPreScreener>

FIND-CKD is a clinical study evaluating the efficacy and safety of an investigational drug called finerenone in non-diabetic chronic kidney disease.

If you do not have diabetes and

- are being treated for high blood pressure
- were told by your doctor that you have increased protein levels in your urine

you may be eligible to participate in the FIND-CKD study.

For more information, contact: 888-842-2937 <https://bit.ly/FIND-CKD>

[Example 2 \[to healthcare professionals\]](#)

A banner for the AAKP Center for Patient Research and Education. The top left features the text "CENTER FOR PATIENT RESEARCH AND EDUCATION" in blue and "RESEARCH ALERT" in green. The top right has the AAKP logo and a circular logo for "DECADE OF THE KIDNEY" with the text "NATIONAL ASSOCIATION OF KIDNEY FOUNDATIONS". Below the text is a paragraph: "As part of AAKP's National Strategy within the AAKP Center for Patient Research and Education, we continue to expand our capacities to involve a far larger and more representative number of patients in both research and clinical trial opportunities. The results of these opportunities will help create a clearer understanding of the patient experience and can help shape the future of kidney disease treatment and care." At the bottom, it says "DID YOU KNOW?" in large green letters, followed by "About 1 out of 4 people with" and an illustration of a hand holding a magnifying glass over a kidney icon.

CAN A HEART PROCEDURE HURT YOUR KIDNEYS?

Learn what your doctor can do.

If you're having a heart procedure, it's important for your doctor to take care of your kidneys too. That's because the contrast dye used in many procedures can be hard on the kidneys when you have renal disease. Fortunately, there are effective measures your doctor can take to protect you.
